Customer-Centric Insurance Technology, Data & AI Transformation Executive with **28 years** of progressive leadership in U.S. and global Tier-1 carrier operations across **Allianz, AXA, AIG, CGI, RSA, and Oriental**. Proven ability to define and execute **enterprise AI strategies**, Platform Modernization, Policy Admin Implementation/Support, Operational Value Stream optimization, build and scale **High Performing emerging technology teams**, and deliver high-impact **AI/ML, GenAI, and Multi-Agentic AI solutions** across **P&C, Life, Broker and Reinsurance** Divisions. Trusted C-suite advisor driving measurable business outcomes through strategic alignment of **business strategy, technology architecture, data governance, and regulatory compliance**. Recognized thought leader with **20,000+ global followers across 146 nations**.

I began my insurance journey at **age 16** through 2 years of intensive formal insurance education and entered the industry as an **Underwriter at age 18**, spending my first 12 years deeply embedded in core carrier/Broker operations, gaining deep hands-on experience across underwriting, claims, policy administration, reinsurance, finance, and risk functions, combined with senior leadership delivering core platform modernization, cloud migrations, DevSecOps, and **scalable Ethical enterprise AI / data platforms in highly regulated environments**.

Over the last **16+ years**, led global transformation programs and delivery organizations, including building, scaling and orchestrating a GCC team of **220+ professionals** across multi-country initiatives. Since 2016, delivered **42 AI use cases in production** with measurable impact across underwriting, claims, and operations, enabling improved risk assessment, operational efficiency, regulatory compliance, and customer experience at enterprise scale.

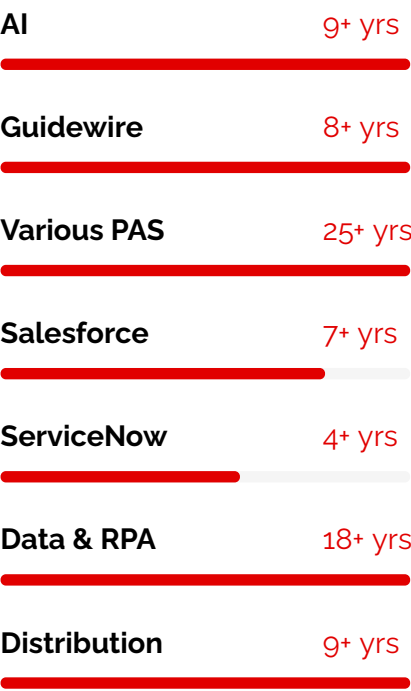

Key Strengths: Target Operating Model; Enterprise Transformation strategy and roadmap development; building and leading high-performance engineering and Business Agility teams; AI use case identification, prioritization, and value realization; Policy Admin Implementation and Production Support; Predictive AI (risk scoring, claims triage, fraud detection), GenAI (document processing, underwriting assist), and Agentic AI solutions; LLMs development, deployment, and lifecycle management; Ethical AI, model transparency, risk management, regulatory compliance including GLBA, CCPA; cross-functional leadership across Enterprise Architecture, Business Architecture, and Cybersecurity; embedding AI into underwriting, claims, and actuarial processes; insurance operating model transformation; global program delivery and multi-country execution; vendor and insurtech ecosystem management; stakeholder influence and executive communication
