☑ **Promoted Twice** – PM to DM to (CEM) Client Engagement Manager

Delivery Management: Currently Manage all projects outsourced from AIGSS Philippines to MphasiS across technologies and functionalities (new wins, budgets, timelines, and delivery) with my Outstanding global leadership skills with diversely spread team across multiple global delivery centers(Dublin, Chennai, Mumbai, Banglore, Hyderabad, Makati, Cubao, Alabang & Shangai); This includes Governance, P&L, cost avoidance, continuous value addition, conducting global status meetings(Internal Sr. Mgt/Client Sr. Mgt), customer reviews, transition, migration and enabling nonlinear Revenue Growth $.

- As an Onsite delivery Manager working from Client location, Retrofitted a home-grown AIG Products S3 on Time & Labor basis that supported 475 underwriters/claims adjusters and RI interfacing 1500 employees [saved $10M towards various measures on an ongoing Basis] and was responsible to play multiple role to execute complex requirement by directing to numerous project manager/leads across geographies by adhering to defined process and deliver in efficient ways on time with go-green multiple quality deliverables which triggered many Million Dollar winning proposals like G5, OGIS 85, ODS.

- Involved in many mission critical S3-GOALD / S3 enhancement / implementation from BRD stage till production deployment and provide my General insurance knowledge for proper system mapping and delivery.

- Steer the Governance meeting with AIG Key stakeholders and address high priority task quickly and has opened many opportunities to grow in revenue including brown-bag sessions and also Conduct Weekly internal project status review meet across locations and plan achievable action-plan for next week and track to closure.

- Status Reporting to Project Stake Holders, where by presenting the various progress, exceptions, deviations and reviews with % completion against planned dates across various enhancement/PSM Graphically and provide Senior Management Status Reporting, Customer Projects Liaisons and delivery/process compliance.

- People Management/Retention, Train Key Resource of various Team in the skills required for development, effective communication & Task Scheduling.

- Effort, Cost Control, Team Performance Management, effective Risk Management, Shared Resources Services Strategy and Project Operations between onsite and offshore across multiple delivery centers.

- Currently Managing 20+ projects across technologies (from outdated VB to niche Pega or IBM DS) and verticals like Apps, BPO and ITO.

INSURANCE CERTIFICATION
Fellow FIII
Associate from III.
Non Life Specialization.

- Among 120+ FTE, 60% are GOAL/D Specialist and we grow by tapping areas where competitors don't want to enter thereby we were able to grow from 30 to current size by building technology/domain competencies based on customers technology pain areas

Selected Key Achievements:-

- Ramped up onsite/offshore GOALD resources from a 30 member team to 90+ member team in just two quarters for G5, GIFT, FAS Computron Decomposition, ODS, OneClaim, eDSAT and Solvency II Projects for DRTC and AIGSS which is delivered currently from multiple delivery units across geographies.

- My Account was Key for opening an **New MphasiS entity or office in Philippines** and was also involved in deriving cost effective Policy, New Office Set-up and Implementation and this lowered our cost and we were able to attract new Clients while keeping winning bigger projects within our existing accounts too like GIFT, G5, RSC, SEPA, OGIS 85 etc. Many were won by analyzing AIG's existing issues and helping them with solution/POC and those were converted to Projects later.

- Instrumental in becoming top service provider for AIGSS where our competitor were double the size when we entered and now they are just 5% of our FTE's and the Being an Indian vendor, we were the first to out-number the local Vendor in FTE's too

- Continuous process improvement on all aspects (Governance Model/MSA/Quality/ Finance/Resource Fitment issues) – Developed the overall governance process document which got signed off with AIGSS and MphasiS Sr. Mgt. Helped to design long-range strategic solution for resource retention based on technical forecasts of multiple AIG Key Applications Technologies, also Implemented Coding Standards for Key Technologies, which improved productivity by 40% across 3 key projects.

- Highly motivated and productive team who won more than 20 + customer accolade for various achievements on delivery; most of the accolades are related to AIG Projects 5 Monthly summit Award and numerous Client accolade across all projects and has driven many resources to complete INS Certification and other Technology certifications like Pega PRPC, Infosphere and PeopleSoft

- Able to resolve conflicts professionally and satisfy all customers (Internal/ external) and maintain positive relationship with all parties (customer/customers client/co-workers / Vendors and all my down lines)
