Client Name	AIG L&R (Life and Retirement)	Project Name	Distribution
Role	Regional Delivery Manager	Project Period	Jun 2015 till date
Project Synopsis	**Tools/Technologies:** VB, Sybase, Cobol, XML, DTCC, MS Project, MS Visio **Total Team size** – Peak: **39 FTE** / Average: **25 FTE** **Summary**: Inforce Policy data feed, eDelivery across insured, Brokers, Producers and agents **Core Life Modules**: Enhancement and Integration with ACORD for (S3 – specifically for Variable Universal Life Apps, Claims, FAS, PRINT ENGINE Oracle Docucorp, Data Conversion, Term Life) **Current phase * : Project is in PS mode**		

Responsibilities:

Primary

- I was key to win this L&R project to AIG IT Captive and Total Revenue is 4+ Million US$ and We have been said to deliver within a very narrow short timeline around Jun 2016 and we were successful for all the 9 countries (Germany, Austria, Belgium, France, Italy, Luxemburg, Netherlands, Portugal & Spain) implementation which was given to us and our counterpart TCS had 2 countries

Secondary and Additional

- Additionally, within in the small timeframe we wanted to provide more value ad and we identified key that need to be fine-tuned and we did the same for better response time and cost saving

Client Name	AIG VALIC & Group Retirement	Project Name	Sailpoint IAM
Role	Regional Delivery Manager	Project Period	Feb 2016 to till date
Project Synopsis	**Tools/Technologies:** Sybase, Visual Basic, DB Artisan ad various 3rd party tools **Total Team size** – **43*** [BA 4 / PMO1 / AP 26 / SA 23 / Tester 4 / All Off-shore and 1 FTE Onsite] * **Summary**: Implementation of IAM Sailpoint and Gear(mega) Certification across VALIC Insurance System Bulletin for access management for 10 countries **Core Objective** : – Establishment of New and Discontinuation of legacy access methods(mail/xl) and implemented IAM across 10 Countries – Global program is for 43 countries) and I handled for only 10 Countries **Current phase *: Went live last year and Project is PS mode and we are in ramping down Phase**		

Responsibilities:

SAMUEL RAJKUMAR

Global / Regional IT Delivery Manager (Insurance Domain)

Primary

- I was key to bring this project and total revenue is US$1.5+ Million and We have been said to deliver within a very narrow short timeline, we were successful for APAC (which is my Teams deliverables)

Secondary

- Additionally, we helped in fine-tuning codes in apps for better turn-around in access with security related upgrades

Client Name	AIG L&R EMEA, APAC	Project Name	5 Retirement / Decommission
Role	Global Delivery Manager	Project Period	Oct 2013 to Feb 2018
Project Synopsis	**Tools/Technologies:** Cobol, Gupta Technologies, Sybase, Visual Basic **Total Team size** – Peak Team size 19* [PM/BA 1 / AP 4 / SA 2 / Tester 2 / All FTE @ Country IT Onsite] **Summary**: Compliance and regulatory related Decommission across 12 Countries Germany, Austria, Belgium, France, Italy, Luxemburg, Netherlands, Portugal, Spain, Swiss, Thailand, Taiwan, Hongkong etc **Core Objective:** The core objectives of the Global Program were to discontinue the legacy Life Apps across Whole Life, Group Retirement and Accidental and Dismemberment apps **Current phase *: Decommissioned 4 and Project is nearing closure and we are in resource ramping down phase (currently is only 3 FTE')**		

Responsibilities:

Primary

- I was key to bring this project for my account and total revenue savings is US$2.5+ Million by decommission of app and web servers, DB Server with proper insurance data retention and data backup as per countries insurance commission standards and policies
- This was one of the key reasons for winning the decommission projects in to AIG IT Captive based on past experience on sunset/retirement of 20+ P&C apps

Secondary

- Additionally, I spoke to country legal, and SME with my life insurance background and got the sign-off for data retention

SAMUEL RAJKUMAR

Global / Regional IT Delivery Manager (Insurance Domain)

Client Name	AIG VALIC	Project Name	Global Data Program
Role	Delivery Manager	Project Period	For 2+ Yrs (Since Jun 2016 – Till Date)
Project Synopsis	**Tools/Technologies:** Oracle, SQL Server , AIX, Sun Solaris , CISCO Switches Upgrade **Total Team size – 22 is Global Count** [From Captive side the FTE count is 16 {8 VALIC Prod SME and balance are DBA and Data 2 Analyst}]. **Delivered from** : AIGSS Makati, Alabang, Cubao | MphasiS Chennai & Bangalore **Summary**: This is a life insurance Global Claims Apps Data Tuning and involves 300 TB of Oracle data including 80 TB of Production Data for Oracle 11g db and 14 AIX Servers **Achievement:** Helped in getting this project from my global Data Officer connect as we were only able to ramp up 16 FTE balance staff augmented to Mphasis and we were owing the delivery **Current Status *:** implementation done for 8 countries, Phase 2 Countries 12 countries is on hold from Global and will commence in Q1 of 2019		

Our Responsibilities:

Primary

- Administer and oversight as part of an open systems Regional Delivery Lead, handled Valic clients with DBA , SME , Testing and Data analysis of Oracle 300 terabytes data tuning including 80 terabytes of production data. This includes 26 production, Pre-Prod, UAT, Dev 6 pilot/demo and 16 test/qt Oracle databases (11g) on 14 AIX servers.
- My regional Team Managed 78 terabytes SQL Server data, including 17 production servers and 7 dev/qt servers hosting several SQL Server 2012/2008 R2/2005 databases, on Windows Server2003/2008 individual and cluster servers and VMware slices.

Extended Responsibilities

- As my team only has the core GOAL/D with SME competency we developed the tuning matrix

Key Value ads initiated and succeeded:

- as Home Foreign, Service and Emma Apps were not part of Program, we did not panic, as there were no proper requirement details and mapping details – instead we gave an early warning message in the status reports and as we only had the EMMA SME's, we our self-came up with the data requirement mapping, Business logic and for the backend and the front end requirement fields and coordinated with BU Side SME across 8 countries.

SAMUEL RAJKUMAR

Global / Regional IT Delivery Manager (Insurance Domain)

Client Name	TAGIC & TALIC	Project Name	PS HRMS
Role	Delivery Manager	Project Period	2007–till 2010 (till mphais acquired the AIG IT Captive)
